A few years ago some of the schoolhouses were sadly out of repair. As fast as practicable the board has tried to improve these buildings and the end of this school year finds all of them in fairly good shape. If each year the necessary minor repairs are attended to, there will be no need of extraordinary expenses for some time.

On every side we hear complaints about the high cost of living, it isn't high cost of living with us but high cost of janitor work. It has been a hard winter for janitors and in two schools the boys have found it too difficult for their strength and ability. This has made it necessary to hire adults at quite an increase in expense. Again the tuition bills are higher. Where Keene High school has been charging thirty dollars per year it now asks forty dollars per year for each pupil. We now have twenty-eight pupils there—two will

graduate this spring and there are probably twenty more who will try the entering examinations for next year. This necessitates an appropriation of \$1,400 for tuition alone.

The Swanzey Factory school has been placed under the direction and guidance of the Normal school. This is largely experimental and we cannot after so short a time judge whether it is better or worse than the old way but we trust it is going to be successful. This school has not been turned into a Keene or State school—it is still a Swanzey school only under Mr. Mason's supervision instead of our own superintendent's. All citizens are earnestly desired to visit this school, see the work done there and examine the daily records kept of the regular lessons.

Again the board has put an article in the warrant asking for an expression from you in regard to insuring the school property.

RECOMMENDATIONS FOR APPROPRIATIONS.

The board recommends that the district appropriate under Article 7 of the warrant, in addition to the amount required by law, \$1,400. This sum includes the estimate for support of schools, repairs and superintendent's salary.

To the Selectmen:

In conformity to law the board recommends the following assessments for the ensuing year:

For high school tuition,	\$1,400
For books and supplies,	250

The sum required by law to be raised for support of schools in Swanzey, \$2,325.00.

REPORT OF SUPERINTENDENT OF SCHOOLS.

To the Board of Education, Swanzey, N. H.

My second annual report is hereby presented for your consideration.

We have an earnest, hardworking, faithful corps of teachers, and I think it is a reasonable claim to make that the general condition of the schools is good and the results that are being produced on the whole satisfactory. There is, however, sufficient room for improvement, and constant improvement in school work from year to year should be our expectation as well as our constant endeavor. So much has been added to the sum of human knowledge during the last fifty years that teachers of to-day starting with a good professional education cannot hope, however, to fill their positions efficiently without constant reading for general information and continuous study of professional literature. Some of our teachers are doing this; and no teacher is faithful to her trust who is not growing in the knowledge necessary for acceptable service.

It has been our especial aim this year that our work should be so adapted to different individuals that every one should receive the kind and amount of help and attention that he needs. To reach the so-called backward pupils and to do the best for all classes of pupils, not only patience and skill in class instruction are necessary, but sympathy with, and a thorough understanding of, each individual pupil are essential.

The average membership of all the schools for the year ending July 15, 1913, was 228.69, the average attendance was 211.03. This gives 92.28 as the average per cent of attendance. The highest percentage, 97.98, was maintained in the West Swanzev primary school.

Regularity and punctuality of attendance on the part of pupils is to be sought for, not to make a good showing on the register, but because they are necessary in fixing good habits for life and for best advancement in school activities. Moreover the amount of state aid received by the towns depends in part upon the average attendance for the year.

Chapter 93 of the Public Statutes was revised by the laws of 1913. As the law now stands any child over fourteen years of age who has attended school during the previous year no less than three hundred half-days, and who has a health certificate from the school physician, is, on the approval of the superintendent of schools, entitled to a labor certificate. But, if he has not completed the grammar school course, he must continue his school attendance, until he reaches the age of sixteen years.

Respectfully submitted,

ANDREW P. AVERILL,

Superintendent of Schools.
